You did excellent! Way better than I did. I am so emotional with all of this and the continual assaults, burns, they focus on my skull. It does not help with other tis who are true assholes, I don't think they are TIs, many are in our network that are plants and contribute to the terrorism

My mother is going to die, most likely sister and I will as well.

I should mail you my Aceco so you can test yourself for rfid, dam thing is expensive. You can test yourself and mail it back.

Date of Birth: February 6th 1992

My name is Elizabeth Margaret Lepore and I am 28 years old, a Student, a Army Veteran, a Daughter, and hopeful to become a future Cyber Security Defense Analyst.

I am a Targeted Individual of Domestic and TransNational Electronic Surveillance, Electronic Warfare, Mind Control Operations, Human Experimentation, and Cyber Crime.

I became aware of being Targeted and under illegal Surveillance in late January of 2020. I believe my targeting and surveillance became overt after being covert for several months in 2019. I have attempted to secure my network and devices with different security methods to no avail, even with newly purchased devices. Regardless of the security and safety measures implemented, all of my devices, cellular and internet service are proven to be hacked indefinitely by organized professionals. With my educational background in Cyber Security, I've collected Cyber Crime evidence and I have traced IP addresses back to Geo Locations. I will list some of this data near the end of my report to collaborate with my statement.

In late January I began to notice I was being "Gang Stalked" in public areas, grocery stores, Universities, while driving in my community and on the highway while being followed from Florida to Mississippi where my parents reside. Many of

the noticeable features of the vehicles have Military and Department of Defense License Plates and State License Plates such as Washington, New York, New Jersey, California, Texas, Ohio, Mississippi, Kansas, Arkansas, Maryland, and other States. This is important because the vehicle plates resonate with IP Addresses and Geo Locations in which I've traced.
